Re: Leeds

Our castings are made with metal melted electrically using induction furnaces. We use various materials and alloys to produce these parts. All of the recycled material that we use is listed below and is “pre-consumer” recycled material.

If the castings are produced in Gray iron:

Steel	55 %
Graphite	3 %
Re-melt	<u>39 %</u>

Total Recycled material: 97 %

If the castings are produced in Ductile iron:

Steel	31 %
Graphite	4 %
Re-melt	<u>16 %</u>

Total recycled material: 51 %

If you desire more information, please contact me at 616-754-1100 x304.

Sincerely,

Steve Ziny
Plant Engineer
